

MADE WITH 100% RECYCLED MATERIALS

In our opinion, the use of more new materials is bad for the environment. And our design should be as minimalistic as possible. We strived for a carbon footprint as low as possible, and developed a design that fits everyone's lifestyle. Therefore, Avira reusables are made of 100% recycled materials, which are third party certified. And all of them are intensively reusable. In addition, the minimalistic design suits anyone who is committed to a better, environmentally friendly world.

Avira reusables. More is less.

Material

RECYCLED STAINLESS STEEL

Stainless steel is one of the best corrosion-resistant materials that can be recycled indefinitely, without losing its quality and other properties. The extended life of stainless steel makes it a prominent material in circular economy.

Impact:

Recycled stainless steel saves about 44% of GHG-emissions, compared to the products manufactured from conventional stainless steel.

Recycled content:

Post-consumer & Pre-consumer

Recyclability:

Second cycle of recycling depends on the quality and recycling method, however, stainless steel can be recycled indefinitely.

Material

RECYCLED POLYETHYLENE TEREPHTHALATE (PET)

Polyethylene Terephthalate (PET) also known as Polyester, is the most commonly produced plastic in the world & the easiest to recycle among other thermoplastics.

**Impact:**

RPET reduces about 48% of GHG-emissions, when compared to conventional polyester.

Recycled content:

Post-consumer

Recyclability:

Second cycle of recycling depends on the quality and recycling method, however, it can be recycled and reused again.

Material

RECYCLED POLYPROPYLENE(PP)

Polypropylene is one of the most widely used plastics in the world, known for being a durable thermoplastic & multipurpose, used in variety of applications.

**Impact:**

Recycled Polypropylene saves about 50% of CO₂-emissions, compared to conventional Polypropylene

Recycled content:

Post-consumer

Recyclability:

Second cycle of recycling depends on the quality and recycling method, however, it can be recycled and reused again.

REPURPOSABLE PACKAGING

To reduce waste, the packaging is repurposable. Make a phone stand out of it, or use it as a base for plants.

Ways to repurpose this box:

Phone holder

Pen holder

Pot a plant

2% of proceeds we donate to Water.org, an organization that strives to make financing for water and sanitation affordable and accessible to those in need.

AVIRA

PERSONALISATION

When it comes to promotional gifts, the right printing options can significantly enhance their impact and effectiveness. These printing choices allow businesses to showcase their brand, logo, and messaging in a visually appealing and memorable way.

When aiming for a premium feel, debossing and engraving are great choices. These methods create a subtle yet impactful impression on flasks and mugs.

Itemnumber P435.021 **CO₂ footprint** 1.22 kg

Decoration technique Silkscreen round

Latest technology

While traditional techniques like pad print and silkscreen remain successful, we continually integrate new and exciting methods. Recent trends indicate a growing demand for embroidery, transfer printing, CO₂ and laser engraving, as well as 360-round decorating.

As part of our commitment to the environment, we will be implementing full solar-powered laser engraving and CO₂ engraving, ensuring these techniques have the lowest possible environmental impact.
