GREAT
VALUE
FOR YOUR
BRAND

Raising environmental awareness - recognising obligations: Together, let us work towards a better future with less waste and more sustainability!

Recycled and renewable materials make manufacturing processes more eco-friendly while maintaining a high quality. At the same time, working conditions, pollution, and environmental protection are considered. Our new promotional products catalogue for 2024 offers a variety of novelties and classics that pay particular attention to these issues.

Be inspired by our catalogue. You will find an impressive selection of products with large printing areas for your individual advertising message. We are happy to assist you with finding the perfect finishing option and the right advertising application for your desired product. We offer customised solutions for every budget that fit your brand, campaign, event, or company requirements. Our goal: sustainable success for you!

Our team is happy to assist you with your order or answer your questions – don't hesitate to contact us. We look forward to future projects and collaborations with you!

Your Sales Team

MADE IN EUROPE

In order to reduce our carbon footprint, we rely on products MADE IN EUROPE.

This way, we save on transportation, resources, and, most important, CO2 emissions.

THE BEST IDEAS

We aim to have all-around satisfied customers! That is why we attach great importance to service, quality, and safety. The performance-oriented interaction between these three components creates trust. In this sense, nothing is impossible for us in order to satisfy you. – You may also contact us for direct imports.

Tampon print

A template of the logo is made and filled with the desired colour of ink. Then the colour is transferred directly onto the article with a silicone pad. As this pad is made of flexible silicone, almost all surfaces can be printed – including uneven surfaces.

Transfer print

A heat press, consisting of a heating plate and base plate, is used to apply the logo / picture / text, pre-printed on thermal paper, onto the item. Beforehand, the thermal paper was imprinted through silkscreen or direct print.

Silkscreen print/ Textile printing

For silkscreen print, a screen is made impermeable in areas not to be printed through a photochemical process. The promotional item is placed under the screen and printed on the areas where the screen is permeable. The colour is pushed through the holes and applied to the product. This method is ideal for flat surfaces, such as textiles or segments of umbrellas.

Laser engraving

A method using a laser beam to engrave a logo into nearly any material. A computer-controlled process ensures a pinpoint reproduction. The final result always depends on the material surface. A colour replica is not possible.

Digital transfer

Digital transfer works in two steps. First, a special thermo paper is imprinted digitally (see passage „direct print“) and cut to size. In a second step, the logo / picture / text is then printed onto the product under pressure in a heat press.

Direct print

Using digital print, you receive long lasting, vibrant colours. Items of many different materials and sizes can be branded individually. The big advantage: Apart from the handling charges, the printing cost merely depends on the size of your logo, independent of the number of colours.

Doming

The doming sticker is made of synthetic resin and a sticker with the company logo. The clear resin is fitted precisely to the logo print, protects the print, and gives the logo a 3D effect. The convex sticker is perfect for advertising on rough or hard materials, such as an umbrella handle.

Embroidery

A digitally controlled process in which a computer steers a needle and thread to embroider a surface. As many as 10 colours can be used in one embroidery procedure. This robust form of refinement can be used on all textiles. The logo must be provided in order to determine the number of stitches and perform an accurate cost calculation.

Reflective transfer

Reflective transfer is a type of thermal transfer in which a design (e.g. a logo) is printed on a special reflective foil and then ironed onto a material (for example, on umbrella, cap, or backpack). The reflective effect "transfers" to any Pantone colour.

All imprint possibilities shown in the catalogue are real. Already inspired?

These items are more than just advertising tools; they are an expression of complexity and multifunctionality, showcasing the deep values of your brand.

EXTRAORDINARY

Each TOPiCO product shares one common feature - uniqueness. We focus on delivering uncommon promotional products to make your brand stand out in a crowd. We understand that in the world of mass production, uniqueness makes all the difference.

MAKE CONSCIOUS CHOICES FOR YOURSELF AND THE PLANET

CORK - cork is the outer bark of the cork oak tree, which is harvested without harming the tree and will regenerate thereafter. Waste from cork production can be used to produce further cork items or can be upcycled. Warm material, natural to the touch and in appearance.

BAMBOO - one of the fastest growing plants on Earth. It can be harvested and used for production within short time. Grows back after being cut down and is a persistent plant that requires less chemical protection. Durable material, natural to the touch and in appearance.

WOOD - easily available locally, which reduces the need for long-haul transport. Preferably from sustainable forestry, where the amount of wood collected is replenished by new plantings.

STAINLESS STEEL - one of the most commonly recycled materials in the world. Steel recycling is effective and allows for repeated processing without compromising quality. Safe for food storage; does not affect its taste and smell. Resistant to corrosion.

GLASS - one of the most recyclable materials in the world. Recycling glass is effective and allows for repeated processing without loss of material properties. Chemically stable substance - does not release harmful substances into water or soil. Safe for food storage; does not affect its taste or smell.

RPET - made from PET plastic bottles, which helps to reduce waste and need for new petrochemical raw materials. RPET production usually requires less energy than PET. Retains basic properties of plastic - durability, flexibility, resistance to damage.

COTTON - biodegradable and thereby reducing waste. Depending on the type, cotton can be grown with minimal use of chemicals (e.g. organic cotton). Natural, multi-purpose material.

JUTE - natural fibre made from jute plant, which grows relatively quickly and does not require large amounts of chemical treatment. Compared to other crops, it needs less water. Decomposes naturally and is durable.

RECYCLED PAPER - paper recycling reduces the need to cut down trees. The production of recycled paper requires less water than the conventional production of paper because it is a less complex process. Can be recycled time and again, which promotes a closed material cycle.

THE POWER OF SYNERGY

To protect the environment, both consumers and producers play a vital role in adopting sustainable practices. For consumers, making informed decisions is the key – choosing eco-friendly products, reducing excess consumption, and adopting recycling habits are important steps. Meanwhile, PromotionTOPS contributes by using environmentally-friendly product materials, minimising packaging waste, and introducing efficient energy consumption initiatives. Together, we form a strong alliance to reduce unnecessary waste and promote a harmonious balance between consumption and preservation of our precious ecosystems.

LOVA Green

LOVA Green is a product brand that combines quality with environmental awareness. Our diverse selection emphasises durability and the use of renewable or recyclable materials. Take your lifestyle to a new, more sustainable level with every LOVA Green product. Make a choice that reflects your values. Discover our contribution to a greener world with our LOVA Green selection.

We are aware of the environmental challenges we face and the need of adopting sustainable practices. Our commitment is displayed through our brand LOVA Green. We've developed a comprehensive scoring system that evaluates our products across four key dimensions:

- durability
- produced locally
- recyclable
- made of natural materials

We believe in transparency and continuous improvement. As we refine our evaluation methods, we remain committed to offering you products that are better for the planet without compromising on quality and functionality.

Join us in creating a better future with LOVA Green.

PACKAGING DESIGN

Thousands of items - one concept

It is time for economy and ecology to go hand in hand. We feel responsible to contribute to a greener and more sustainable future. Therefore, we have changed to a standardised and sustainable packaging design for all our items. It is based on the use of kraft paper as packing material. This paper offers superior strength and protection as well as being 100 % eco-friendly. The more than 2500 items of our range will not only be packed safely and ready for transport but will also make a good impression on the end customer without revealing the surprise at first glance. Thus, we consider the entire supply chain.

Details on the back

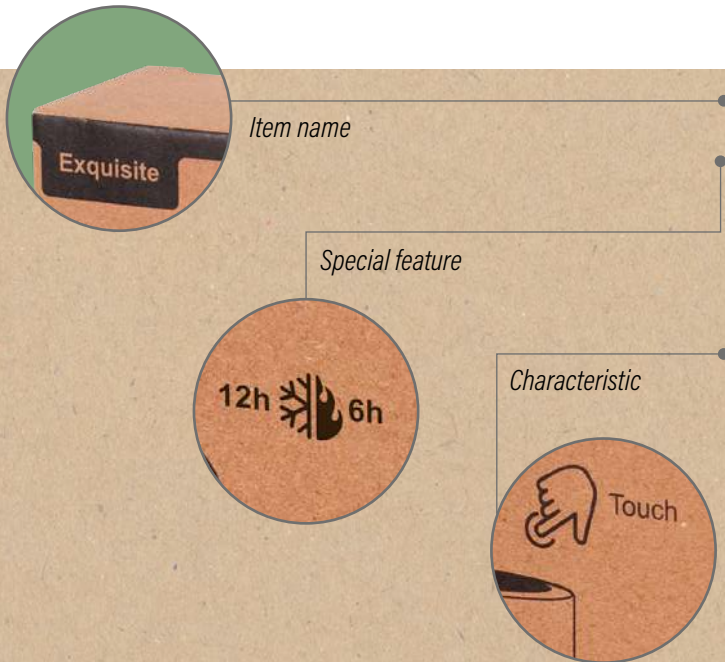

RETAIL

The packaging is robust, simple, and appealing thanks to its clean design. Hence it will also impress retail customers. The front of the packaging, showing a 3D sketch of the article, will be an eye-catcher on the shelf. The stable and stackable packaging makes sure that even transporting large quantities of the item is no problem.

Everything at a glance

The packaging does not only serve as a box for transportation but can also be used as a gift box. All important information like product name and colour are shown. Other USPs (unique selling points) can be found on the back. They are shown in two languages and visualised with icons. This will attract attention but not take away from the unboxing experience.

RECYCLING

The kraft paper contains recycled fibres and is durable. The packaging requires little paint and no layers of varnish. After use it can be recycled again and used as new raw material. This saves resources and continues the cycle.

DIGITAL TRANSFER

Digital transfer is the transfer of a digital image to fabric using foil and a transfer press. DTF is the most modern version of transfer print: It guarantees a photographic quality of prints in a full range of colours with tonal gradations. The resulting print is soft in touch and flexible.

CHARACTERISTICS:

- photographic print quality and perfect colour reproduction (CMYK)
- precise shapes with minimum line thickness (0,5 mm)
- pleasant to touch (soft touch)

Nordic plains

Scandinavian design is a blend of simplicity, comfort, and elegance. Functionality influences the product form, while the materials used and the precision of manufacturing see to a high quality. Our new Nordic plains line of bags and backpacks is all of that and more. It is an answer to the needs of those who look for comfort and simplicity, who value minimalistic creation and consciously choose products that accent their personal style. By designing today, we influence the future: durability, safety, and balance are values which we share with you. At work, at home, during leisure activities and play time, we support your efficiency and provide peace of mind, confidence, and reliability.

UNDERSTATED DESIGN, praise for modesty

The „understated design” philosophy is currently one of the strongest design trends. Our Nordic plains style is minimalistic, calm, simple, and modest. Nordic plains products increase our personal efficiency as well as discreetly support and facilitate every aspect of our life – professional and private. Hence, the logo is designed to represent the outline of a mountain and a flag to place at the top once you achieve your goal.

A GIFT FOR CUSTOMERS AND ENVIRONMENT

Creating an ecological umbrella is primarily about choosing the right materials: environmentally friendly and durable in the most difficult weather conditions. The RPET polyester used in the canopies is made from recycled plastic bottles. The elegant raw wood and strong fibreglass ribs make the umbrellas timeless in design. Even the foil in which they are packed is biodegradable. It is a beautiful gift not only for your customer, but also a kind gesture to our environment.

REFLECTIVE TRANSFER

Reflective transfer is a type of thermal transfer in which a design (e.g. a logo) is printed on a special reflective foil and then ironed onto a material (for example, on umbrella, cap, or backpack). The reflective effect 'transfers' to any Pantone colour.

CHARACTERISTICS:

- beautiful colours (according to the Pantone pattern book)
- reflector increases safety (helps wherever good visibility is needed)
- durable print quality

DIRECT PRINT

Using digital print, you receive long lasting, vibrant colours. Items of many different materials and sizes can be branded individually. The big advantage: Apart from the handling charges, the printing cost merely depends on the size of your logo, independent of the number of colours.

CHARACTERISTICS:

- photographic print quality and perfect colour reproduction (CMYK)
- durability and resistance to abrasion
- greener printing technology
- the speed of printing

360° engraving

360° is a classic engraving process, which thanks to special rotary overlays is performed over the entire surface of the cylindrical product. After the logo is applied, the product looks as if it was designed together with the print.

WHY IT'S WORTH CHOOSING:

- maximum imprint field
- possibility to place additional decorations besides your logo
- personalisation from 1 piece
- high durability

360° silkscreen printing

360° screen printing is a traditional printing process performed on round and cylindrical objects. To apply the print, the machine pushes paint through the mesh with an exposed pattern while the object rotates.

WHY IT'S WORTH CHOOSING:

- maximum imprint field
- possibility to place additional decorations besides your logo
- precision and print quality
- high durability

PRECAUTIONS FOR USE

TEMPERATURE VARIATIONS The time that hot or cold beverages can maintain their temperature was tested in a standard room environment; this duration may differ when the mug or bottle is kept in extreme weather conditions. **CHECKING THE LID AND HANDLING** Before use, please ensure the lid is securely closed and check for any potential spills after filling the product. For added safety, it's recommended to always carry your vacuum flask upright to prevent accidental leakage.
