1. About Dopper

Dopper exists to solve something, not sell something.

Specifically, we exist to solve the problems caused by packaged water, and the damage it does to our world's waters.

In short, we are here to end packaged water.

We do this by getting people to drink tap water, by stopping companies from selling packaged water, and by lobbying governments to ban it altogether. Our solutions range from reusable water bottles and accessible water taps to community actions and governmental lobbying. And through it all we raise the bar in sustainable standards.

A large, vibrant blue circle is centered on a light cream-colored background. Inside the blue circle, the text "We exist to solve the problems caused by packaged water." is written in a bold, white, sans-serif font. The text is arranged in six lines, centered horizontally within the circle.

**We exist
to solve the
problems
caused by
packaged
water.**

About Dopper

All Dopper bottles and accessories are Cradle to Cradle Certified® Bronze or higher, with the Gold certified Dopper Original being the most sustainable reusable bottle in the world. Every bottle we sell and tap we install helps us to challenge single-use packaged water and kick-start clean drinking water projects in Nepal.

We are 100% committed to achieving our mission, and you can help us take it further. Join our community and help us to end single-use packaged water.

Sustainability sto

Cradle to Cradle

All of our bottles and accessories are Cradle to Cradle Certified®, meaning that they adhere to the strictest sustainable requirements. The Doppet Original is the first Cradle to Cradle Certified® Gold reusable bottle collection in the world.

Company

Since we sold our first
Dopper bottle in 2010 we've
prevented the sale of over 3
billion single-use packaged
water bottles as well as
raising awareness of the
problem they pose and
providing access to clean
drinking water in Nepal.

Bottle

In 2009, after watching a documentary about plastic soup and seeing single-use packaged water bottles wash up on the beach near his home, Merijn Everaarts decided to act. After asking himself why people would buy packaged water when they already have excellent water in the tap, he launched a design competition to find the perfect reusable water bottle. From this, the Dopper bottle was born, with the first Dopper Original being sold in 2010.

In 2023, an external party assessed Dopper's impact in the Netherlands. They found that people who were given a Dopper bottle used 104 fewer single-use packaged water bottles (per person, per year) – that's 2,6 kg worth of plastic – in the first 5 years of using the bottle. While it may sound like a drop in the figurative ocean, Dopper bottles have already prevented the sale of over 3 billion bottles.

Maps

According to research from Tabula Rasa, an agency specialised in behavioural change, people want to refill their reusable bottles when they're out of the home but struggle to find public water taps. To overcome the issue, we added every publicly accessible water tap in the Netherlands to Google Maps, with **Belgium, France, Spain, and Germany following close behind.**

Simply search 'water tap' in Google Maps and you're away.

Community

Want to do more to help end packaged water?

Join our global community of individuals and organisations and commit to banning single-use packaged water from your daily life. Together, we're committed to stopping single-use packaged water bottles from entering our world's waters.

We do this by changing our daily habits, hosting and attending events, sharing key insights and information, and helping people to change their behaviour.

Company

Clean Drinking Water Projects

Access to water is a human right. Yet an estimated 1 in 10 people worldwide can't just turn on the tap. In Nepal, the Himalayas offer one of the largest freshwater reservoirs in the world. Yet due to a lack of infrastructure, 24.3 million Nepalis don't have access to basic water services.

That's why every Doppet bottle sold contributes to the work of our two main partners in Nepal: Dutch NGO Simavi and Kathmandu-based social enterprise SmartPaani. Together, we offer education, raise awareness and kick-start (drinking) water projects in different areas of the country.

Dopper Bottles

The best reusable bottles on the planet. The unique three clean, and easy to recycle. All Dopper products adhere to

- All bottles and accessories are Cradle to Cradle Certified®. The Gold certified Dopper Original Gold is the most sustainable bottle collection in the world. All Dopper accessories are certified Cradle to Cradle Certified® Silver, and the Dopper Insulated, Steel, and Glass are all Cradle to Cradle Certified® Bronze.
- We are a carbon-neutral company. Via GoodShipping we ship our products using only biofuels and rely solely on bicycle delivery for online orders within the Netherlands.

**One-part design makes Doppet bottles easy to use, easy to
meet the strictest sustainability standards in the world:**

- The Doppet Original is made in the Netherlands using 100% renewable energy sources.
- The Doppet Insulated, Steel, and Glass are made in Chinese factories that use Amfori's Code of Conduct as a baseline for their manufacturing standards. In 2022 they earned A-level status for environmental protection.
- We are a Certified B Corporation with a score of 132.8 points, putting us in the top 10% of all B Corps globally.
