carasman

Today, there are many types of alcoholic beverages, developed through the fusion of culture, childhood tastes that shaped affinities, and local vegetation, making each drink unique and reflecting the place where it comes from.

For example, Carasman gins do not only tell the story of real places, but also of an inner journey. Pure gin is neutral and easily accepts flavors, and our base gin contains 16 different botanicals that give the spirit of nature.

But this is just the beginning.

Carasman adds new flavors by infusing terpenes from quality marijuana varieties into gins and liqueurs, providing a deep entourage effect. Explore the offer and choose your favorite among five premium botanical infusions, created according to the philosophy of Carasman - a good life and even better drinks, on your terms.

The fast-growing Carasman hemp brand was developed by a group of enthusiasts, starting from their hemp cultivation on the slopes of the Zagreb mountain in Karasmani.

The love for life and the pleasures of life of its founders also developed Carasman in the direction of infusing cannabis terpenes into alcoholic beverages. The experience in creating previous products that rely on the benefits of hemp greatly enabled the quality development of a truly unique series of gins, and then Terraninna. A side job for pure pleasure, at the urging of a group of lucky people who tasted it in the early stages, grew into an ambitious project that developed into a series of exceptional products that we present to you today.

Spirits like no other.
